CCCCCRTTTTA PRART RA

Patel S.B.;

"Two genes that map to the STSL locus cause sitosterolemia: genomic structure and spectrum of mutations involving sterolin-1 and sterolin-2, encoded by ABGC5 and ABCG8, respectively.";

Am. J. Hum. Genet. 69:278-290(2001).

-i- FUNCTION: Transporter that appears to play an indispensable role in the selective transport of the dietary cholesterol in and out of the enterocytes and in the selective sterol excretion by the

liver into bile. SUBUNIT: May for

form heterodimers with ABCG8 or be tightly coupled to

Sitosterolemia patients have hypercholesterolemia, very high levels of plant sterols in the plasma, and frequently develop tendon and tuberous xanthomas, accelerated atherosclerosis and premature coronary artery disease.
